## Serious Games in Obstetric Anaesthesiology

\*\*Access to Serious Games is limited to pre-registered delegates

**Managing pregnant women with bleeding disorders can be a major challenge in the labour ward as they present the anaesthesiologist with diagnostic, interpretation and management challenges.**

### Learning objectives:

During this unique and interactive learning experience, participants will be able to:

1. Understand clinical and technical tools to assess, anticipate and manage obstetric haemorrhage;
2. Practise Crisis Resource Management (CRM) skills;
3. Apply strategies available to identify blood volume loss and practise decision-making based upon the blood volume loss;
4. Perform viscoelastic testing in obstetric haemorrhage management and understand monitoring devices and their utility for obstetric haemorrhage management;
5. Debate the advantages and disadvantages of general versus neuraxial anaesthesia for the patient with obstetric haemorrhage.

*Target audience: Anyone interested in obstetric anaesthesiology (no prior gaming or simulation experience necessary).*
