

## Simulation Lab

### High Fidelity Workshops

#### Learning objectives:

During these 90-min sessions, one or two challenging clinical scenarios will be reproduced in a fully immersive environment including a high-fidelity patient simulator (mannequin). Delegates will have opportunities to manage and/or observe these clinical cases. After each scenario, skilled instructors will provide constructive feedback during a debriefing session in which all participants will take part.

During these sessions, participants will:

- understand the importance of non-technical skills;
- review and improve their knowledge in patient management in the clinical topic of the session (algorithms and clinical guidelines);
- practice and improve technical skills related to the clinical topic of the session.

*Target audience: Residents, fellows and practitioners interested in improving their skills and knowledge in anaesthesia or ICU crisis management.*

Workshop

#### **SIMHF1 Challenging cases in airway management**

\*\*Access to this workshop is limited to pre-registered delegates

**10:30 – 12:00**

Chair: Georges L. Savoldelli (Geneva, Switzerland)  
Chair: Dan Benhamou (Paris, France)

#### **Challenging cases in airway management...**

Instructor: Morgan Le Guen (Suresnes, France)  
Instructor: Kemal Tolga Saraçoğlu (Istanbul, Turkey)  
Instructor: Ralf Krage (Dubai, United Arab Emirates)  
Instructor: Massimiliano Pirrone (Milan, Italy)
